To: "info@socotransmission.com" <info@socotransmission.com>

I want to object to the transmission projects in Southern Colorado. On the website (<http://www.socotransmission.com>) the following are being considered:

1. Approximately 95 miles of new double-circuit 230-kilovolt (kV) transmission line from the existing San Luis Valley Substation, north of Alamosa, to a new Calumet Substation near Walsenburg
2. A new 230/345-kV Calumet Substation at a location six miles north of Walsenburg on property owned by Tri-State and expansion of three existing substations
3. Approximately 45 miles of new double-circuit 345-kV transmission line between the proposed Calumet Substation and the existing Comanche Substation near Pueblo
4. Approximately six miles of new 230-kV transmission line between the proposed Calumet Substation and the existing Walsenburg Substation

I-210-001

I as a tax payer object to the above because of the environmental impact to the land, animals and the health of being close to the power lines.

PLEASE, listen to the people and do NOT allow this to happen. Think about what if you had land in your family that was bought away from the city, to be with nature, and these power lines cut across your land.

Listen to the people, and the animals
Paul

I-210-001: Environmental Consequences (In Review)

Your email/letter/comment form has been received and your comment noted. Potential environmental consequences and mitigation measures from the proposed project will be addressed in the Environmental Impact Statement.

The Environmental Impact Statement is anticipated to be completed in late 2010 and will be available at <http://www.usda.gov/rus/water/ees/ea.htm>.
